

The MACs for the test layout will be as follows: 0000000000XY. For each interface look in the table below to find the appropriate last 2 values. Find your group number on the left, follow it across to find the group's id that interface connects to and the intersection contains the last 2 numbers for that interface's MAC address. You will need to also correctly list the interfaces that connect to your gateway, including port, machine, and probably MAC address. Note for this layout, I am group 3.

Group	G 1	G 2	G 3	G 4	G 5	G 7	ST1	ST2
G 1							19	
G 2							29	
G 3			ab/ba	a4	b5		a9	b8
G 4			4a					
G 5			5b					
G 7								78
ST1	91	92	9a					
ST2			8b			87
